PRIMARY EDUCATION EDITION

The Parliamentary Review

A YEAR IN PERSPECTIVE

Highlighting best practice

Broad Oak
Primary School

Broad Oak funds a coaching mentor from the company One Goal to deliver a universal offer for all pupils to build character by developing the pupils “6 Habits”.

This is a bespoke programme designed to give our pupils the required skills to think in an informed way, to work collaboratively with others successfully and have positive mind sets that will set them on the path to success.

At Broad Oak we understand the importance of physical education, recognizing that it has significant benefits to health and wellbeing, improving brain function and thus the ability to learn.

We use our Sport Premium money innovatively to ensure we provide high quality PE and school sport for all pupils.

Bespoke CPD for staff is provided by a PE specialist one afternoon a week through team taught sessions.

Targeted physical intervention groups support learning. A physiotherapist works with our SEN children to develop their balance, co-ordination and agility. These children also access a multi-sensory room experiencing combinations of sound, light and aromas to meet their sensory needs. Fitness sessions are run for our less active children.

We have developed a broad variety of enrichment opportunities before, after school and at lunchtimes to engage all children in sport and physical activity. The percentage of KS1 and 2 children taking part in these activities has risen from 56% to 78%.
